

# Placemate

Group no - 9

## Weekly Report - Sprint 1

15 Sept - 21 Sept

### 1 Summary of Tasks Completed

Task ID	Task Description	Assigned to	Status	Completion Date
SCRUM-1	Schema design and implement in backend	Smit, Parthiv	Done	20 sept
SCRUM-2	Create frontend environment of React	Vrushil	Done	21 sept
SCRUM-3	Design Login Page, Forgot Password Page	Nitesh, Kishan	In Progress	
SCRUM-4	Weekly progress report creation	Dhruvisha	Done	22 sept
SCRUM-5	Learn API integration in React and test on Postman	Meet, Jash	Done	19 sept

### 2 Roadblocks / Issues Faced

Description	Impact	action taken
Finding a cloud-hosted database with minimal resource limitations that works seamlessly in both local and production environments.	Medium	After evaluating options, Supabase was selected due to its scalability, flexibility, and ease of integration for both development and production environments.
React build version mismatch	Low	Synchronized dependencies via npm install

### 3 Backlog

SCRUM-3	Design Login and Forgot Password Pages (moved to next Sprint)
---------	---

### 4 Upcoming Tasks (Next Week)

Task Description
Finalize backend environment and folder structure setup
Database migration and management
Implement core data utilities

### Summary Notes / Comments

The team completed all initial setup and basic integration tasks.

Next sprint will focus on backend module implementation and synchronization with frontend.

Communication and version control through GitHub and JIRA are consistent.
