SCRUM-41	Maintain API Documentation and Swagger Updates	Jash	Done	30 Sept

### 2 Roadblocks / Issues Faced

Description	Impact	action taken
Integration	Medium	Coordination Via Meet
Maintaining design consistency	Low	assigned one person to modify required chang

### **3 Backlog**

SCRUM-16	Develop Student Module in Backend
SCRUM-34	DRF Research
SCRUM-35	Company Drive Detail 3.2.10
SCRUM-36	Add Drive 3.2.11

### **4 Upcoming Tasks (Next Week)**

Task Description
Begin implementing backend functionality for the student module to handle registration, profiles, and drive participation data.
Build full CRUD operations for managing company data in placement drives.
Perform unit and integration testing for key components to ensure stability and logic accuracy across modules

### **Summary Notes / Comments**

Sprint 2 focused on completing key backend, frontend, and documentation milestones for the Placemate project.

The team successfully implemented authentication pages, backend setup, database migration, and role-based access control.

Front-end progress included admin, registration, and placement pages, while backend tasks ensured API integration, validation, and security.

Additionally, design documentation (HLD, LLD, FDD) and JIRA task management were finalized.
